**1Password**

**1PASSWORD LIST OF SUB-PROCESSORS**
(EFFECTIVE JANUARY 13, 2026[1])

To support the delivery of the 1Password Services, 1Password uses Sub-Processors that may store and process personal data of 1Password's Customers. This page provides important information about the identity, location, and role of our Sub-Processors.

1PASSWORD AFFILIATES

| ZenDesk, Inc. | EPM, SaaS Manager | Customer Support | EU[3], USA |

---

[1] *The subprocessor list has been updated to reflect that "SaaS Manager" is the current product name for the service previously branded as "Trelica by 1Password." The change reflects a product rebrand only and does not affect the underlying service or sub-processor arrangements.*

[2] For EPM services, the location for this Sub-Processor will depend on the region chosen for your 1Password account, with the exception of when using item sharing, which will be temporarily hosted in the EU by default as long as the item share lasts. SaaS Manager services are hosted in the EU or the US depending on the region chosen by the account owner during sign up.

[3] The location for this Sub-Processor is defaulted to the US, except for SaaS Manager services made prior to 2025, which are hosted in the EU region.
